

The chart displays the daily number of deaths in DeKalb County, Georgia, from March 1 to July 1, 2020. The y-axis represents the daily number of deaths, ranging from 0 to 10. The x-axis represents the date. The chart includes two data series: daily reported deaths (gray bars) and a model's estimate (solid blue line with a light blue shaded confidence interval). The model's estimate shows a peak in late May/early June, followed by a decline. The daily reported deaths show significant fluctuations, with several peaks exceeding the model's estimate, particularly in late May and early June.

Date	Daily Reported Deaths (Gray Bars)	Model Estimate (Blue Line)
2020-03-01	0	0.0
2020-03-15	0	0.1
2020-04-01	2	0.5
2020-04-15	1	1.2
2020-05-01	6	2.5
2020-05-15	7	2.5
2020-06-01	8	2.2
2020-06-15	10	2.0
2020-07-01	2	1.8
